GitHub: https://github.com/Ankit2729 Mobile: +91-9876242345

SKILLS

- **Languages**: C++, Python
- **Frameworks**: HTML, CSS, Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, OpenCV
- **Tools/Platforms**: MySQL, GitHub, VS Code, Google Colab, Streamlit
- **Core Subjects**: Data Structures & Algorithms, Operating Systems, Computer Networks
- **Soft Skills**: Problem-solving, Analytical thinking, Teamwork

INTERNSHIP

The Apprentice Project (MentorMe Foundation) July 2024

Operations Intern

- Coordinated a major app launch event in Moga, Punjab, managing logistics, institutional outreach, and communication with school principals and Headmasters.
- Collaborated with cross-functional teams to ensure smooth execution of operations and stakeholder engagement.
- Contributed to structured planning, coordination, and on-ground execution, supporting the successful launch initiative.

PROJECTS

Urban Expansion Analysis using Satellite Imagery| Python, OpenCV, GIS Feb 2026 - Present

- Developed a satellite-image based system to detect urban growth using temporal image comparison techniques.
- Processed multispectral imagery from the Copernicus Programme to quantify built-up area expansion across time intervals.
- Automated change detection workflow generating measurable urban growth statistics, enabling data-driven spatial insights.

GlobeRank — Country Comparator | C++ Github Oct 2025 - Nov 2025

- Developed a dynamic country comparison tool using Trees, Hash Maps and custom sorting algorithms, improving metric filtering speed by 30%.
- Achieved scalable real-time filtering, sorting, and persistent data storage demonstrating strong problem-solving and optimization skills.

Heart Disease Prediction Web Application | Python, Streamlit Live , GitHub Aug 2025

- Built an ML-based heart disease prediction app using logistic regression on UCI dataset, achieving 82% accuracy.
- Implemented user-friendly input forms, real-time predictions, and downloadable reports.
- Improved model interpretability and real-time inference capability through interactive Streamlit deployment.

TRAINING

AlgoTutor (Ed-Tech Company) June 2025

Student

- A six-week intensive competitive programming training course focusing on DSA and problem-solving.
- Practiced weekly contests on LeetCode, CodeForces, VJudge.
- Enhanced coding efficiency, analytical thinking, and technical interview readiness.

CERTIFICATIONS

- Build Generative AI Apps and Solutions with No-Code Tools | Infosys SpringBoard Aug 2025
- Computational Number Theory and Algebra | NPTEL April 2025

ACHIEVEMENTS

Solved 180+ LeetCode problems | LeetCode Present
Achieved LeetCode Contest Rating: 1594 | Global Rank 198k / 833k | Top 24% Oct 2025

EDUCATION

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.80*** *Aug 2023 - Present*
- **Pathseekers School** Beas, Punjab
  PCM; ***Percentage: 84.4%*** *March 2023*
- **Pathseekers School** Beas, Punjab
  10th; ***Percentage: 85.8%*** *March 2021*
